Keonys, Extends Portfolio of Solutions for the Design and Manufacturing of Composite Parts Through Partnership with SIMULAYT LTD. and MAGESTIC SYSTEMS, INC.

St. Cloud, November 30, 2009 - Europe's first Distributor and Integrator of Dassault Systèmes' (DS) Product Lifecycle Management (PLM) software solutions, Keonys, announced the signing of two distribution contracts with Simulayt Limited and Magestic Systems Inc. (MSI). Both Simulayt Ltd. and MSI play integral roles in the DS PLM solution. Simulayt Ltd. specializes in software for modeling and simulating products made from composite materials while MSI provides software applications to nest, cut, and streamline the ply layout process with laser projection software.

Under these contracts Keonys will distribute these software applications throughout France and Benelux. Simulayt Ltd. and MSI's technologies integrate seamlessly with the DS CAA V5 platform. Simulayt Ltd. provides *Advanced Fiber Modeler*, *Composites Link* and *Composites Modeler for Abaqus/CAE*. MSI has formatted its core technologies, TruNEST™ and TruLASER™ View, to complete a turnkey production solution for composite part manufacturers.

"The use of composite materials offers tremendous opportunities for innovation. This requires us, however, to rethink its approach to design and manufacturing processes, while optimizing its cost of raw materials," observes Jean-Yves Yung, Chairman of Keonys. "Keonys has developed a center of expertise, market knowledge, and unique solutions to the world in this sector. We assist large industrial operations in setting up their projects for PLM product development in composite materials."

Thierry Jean, Chief of the Industry in Composite Keonys, adds: "The solutions provided by Simulayt Ltd. and Magestic Systems, Inc. significantly expand our portfolio of CATIA Composites PLM Solutions. With this partnership, we will be able to provide our customers with the tools necessary to improve their products and processes throughout the entire lifecycle of composite parts – from the initial design to the final production. "

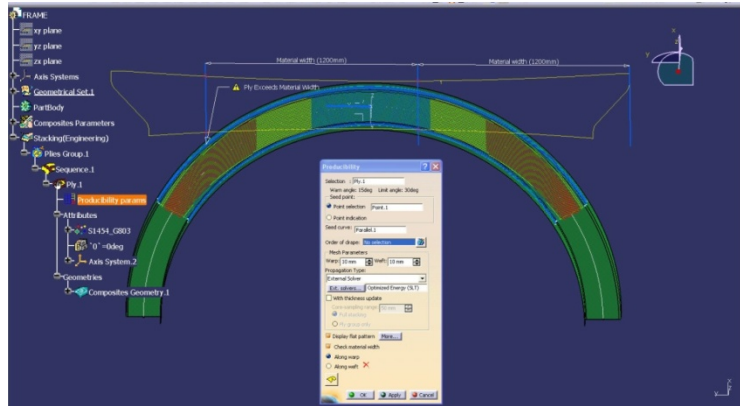

"The know-how Keonys has in design across the composite materials sector is among the most advanced in Europe" says John Klintworth, CEO of Simulayt Ltd. "Our solutions complement the solid portfolio of solutions already offered by Keonys."

"We welcome this partnership that will allow Magestic Systems Inc. to accelerate its development in Europe. We are fully confident in the ability of Keonys to implement our solutions on a large scale and in new markets " said Mike Weber, Vice President of Operations & Business Development at Magestic Systems Inc.

####

About Simulayt Limited

Simulayt develops and licenses the Layup Technology, which incorporates advanced fiber ply modeling and simulation capabilities. This technology allows the efficient and integrated design, analysis and manufacture of fiber reinforced products. By simulating manufacturing processes and linking this data to analysis and design models, the engineer can Develop better products with greater robustness at lower cost. Simulayt has been an adoption partner of Dassault Systemes since November 2005 and following the success of its first product in CATIA V5, Advanced Fiber Modeler, this is the second product it has released Which Allow the two companies' software to be used synergistically.

About Magestic Systems Inc.

Magestic Systems, Inc. is a global leader in Enterprise Software Development and specializes in material and process optimization across all CNC Cutting and Laser Projection applications. An innovator in the manufacturing industry since 1991, the Magestic Systems, Inc. portfolio includes a wide variety of turnkey solutions that assist manufacturers through the entire process of taking a design and turning it into a product.

About Keonys :

Keonys is Europe's first Distributor and Integrator of Dassault Systèmes' (DS) Product Lifecycle Management (PLM) software solutions (CATIA, ENOVIA SmarTeam, ENOVIA MatrixOne, ENOVIA VPLM, DELMIA, Dymola, 3DVIA, SIMULIA). Keonys is the former Dassault Systèmes Sales Division responsible for France & Belgium for 18 years. Keonys counsels on and conducts various integration projects, training and support to over 1,000 clients in many sectors: Aerospace, Automotive, Consumer Goods, Construction, Shipbuilding, Energy, Industrial Equipment, High-Tech, Consumer Products, Life Sciences, Business Services.

CATIA, DELMIA, ENOVIA, SIMULIA and 3DVIA are registered trademarks of Dassault Systèmes or its subsidiaries in the U.S. and / or other countries.
